PROFESSIONAL SUMMARY

Strategy & Operations and Business Operations professional with 2+ years across AI technology, business analytics, operational strategy, project execution and client management. Experienced in identifying operational inefficiencies, data-driven root-cause analysis, developing scalable processes and translating business problems into actionable improvements. Proven in high-volume operations, cross-functional initiatives, client deliverables and AI training/evaluation workflows. Skilled in SQL, BigQuery, Python, business analytics, process optimization and AI-enabled automation. Currently pursuing an MBA in Business Analytics.

PROFESSIONAL EXPERIENCE

Fellow Experience Specialist – L2 Payments

Handshake AI | May 2026 – Present

– Lead operational analysis and resolution of complex payment disputes, escalations and workflow issues while maintaining SLA and quality standards.
– Analysed 2,000+ payment-dispute tickets, identifying recurring process and communication gaps behind significant avoidable escalations.
– Identified a systemic mismatch between internal payment-review stages and user-facing payment statuses; proposed a simplified status framework and SLA-based improvements, securing management approval for engineering implementation.
– Partner with Product, Engineering, Finance, Trust & Safety and Project teams to investigate bottlenecks and drive cross-functional resolutions.
– Conduct root-cause analysis, quality audits and performance reviews; develop tracking frameworks, SOPs and knowledge documentation.
– Leverage SQL, BigQuery, Google Sheets, Jira, Claude AI, Cursor and Zapier for reporting, research, documentation and workflow optimization.

Fellow Experience Specialist – L1 General

Handshake AI | Feb 2026 – May 2026

– Managed 100+ operational cases daily, prioritizing by complexity, SLA requirements and business impact.
– Investigated user, payment, project and account issues with Product, Engineering, Finance and Operations teams.
– Built Google Sheets tracking systems for ticket trends, performance and resolution metrics; conducted quality audits and root-cause analysis.
– Created SOPs and process documentation; supported training and onboarding of three Payments team members.

Business Analyst – AI Training & Evaluation

Turing | Jul 2025 – Sep 2026

– Evaluated LLM outputs using structured quality frameworks: accuracy, reasoning, relevance, consistency and instruction-following.
– Contributed to AI training and human-feedback workflows, including RLHF-aligned evaluation processes.
– Identified hallucinations, reasoning failures, edge cases and model-performance gaps; ran peer reviews and quality audits; supported multimodal evaluation.

Freelance Operations Professional

Toptal | Oct 2025 – Present

– Selected into Toptal’s talent network through a competitive multi-stage screening process.
– Provide freelance operations support focused on workflow optimization, process coordination and delivery quality.

Consultant – Proposal & Client Strategy

Contragenix Pvt. Ltd. | Jan 2025 – Dec 2025

– Ran a multi-client delivery operation: a team of four full-time employees plus external contractors, across five concurrent client engagements in different time zones.
– Owned end-to-end project execution: prioritization, resource allocation, workload distribution, deadline management and final accountability for deliverable quality.
– Managed end-to-end RFP, RFQ and RFI workflows from requirements analysis and solution development through final submission.
– Coordinated sales, technical and executive stakeholders; implemented tracking workflows in Jira, Trello, Asana and Pipedrive.
– Developed quality-assurance frameworks improving deliverable accuracy, compliance and alignment with client requirements.

Data Analyst

Chegg | Nov 2024 – Jun 2025

– Used SQL and Python to extract, clean and analyse datasets, identifying trends, anomalies and content-quality issues.
– Developed analytical reports and dashboards; translated business questions into analytical requirements with cross-functional teams.

Student Research Supervisor – Internship

Islamia College of Science & Commerce | Oct 2022 – Dec 2023

– Coordinated research activities, task allocation, timelines and review cycles; supported data analysis and documentation.

CORE COMPETENCIES

Strategy & Business Operations: Business Operations, Operational Strategy, Process Optimization, Business Analysis, Operational Excellence, Strategic Problem-Solving, Requirements Gathering, Workflow Design.

Program & Project Management: Project Coordination, Cross-functional Program Execution, Stakeholder Management, Risk & Issue Management, Resource Coordination, Delivery Management, Quality Assurance.

Data & Business Analytics: SQL, BigQuery, Python, Pandas, Excel, Google Sheets, Tableau, KPI Reporting, Root-Cause Analysis, Performance Analysis, Data-Driven Decision Making.

AI & Automation: AI Operations, LLM Evaluation, AI Training, Human Feedback, RLHF, Multimodal AI, Claude AI, Cursor, Zapier, Workflow Automation.

Tools & Platforms: Jira, Zendesk, Asana, Trello, Pipedrive, Git, Google Workspace.

EDUCATION

MBA – Business Analytics

Manipal University Jaipur | 2025 – Present

B.Sc. (Hons) – Biotechnology

University of Kashmir | Jul 2022 – Jul 2025

Diploma in Software Development – Python & Project Management

NIELIT | Aug 2022 – Aug 2023
